	Social science deals with the social, political, economic, cultural, ethical and historical aspects of society. All these aspects help to develop different subjects
	of social sciences- sociology, civics, political science, economics, ethics, history
	etc. Students can gather social skills through acquiring knowledge of these
	social sciences. Social science covers only such topics which will inspire diploma
	graduates to become good citizen and will enable them to associate an
Rationale	individual with other individuals in a society or workplace. The diploma
	graduates can gather knowledge of the basic concepts of social sciences,
	human endeavor in the economic system, the realities of Bangladesh economy,
	fundamental rights, contemporary social changes, historical background and
	socio-economic culture of Bangladesh. Social science helps to explain how
	society works, study of social science makes students an efficient citizen in a
